

WeBWork: Online homework assignments

MTH120-005 Spring 2012

Instructor: Bart Van Steirteghem

To use the system, follow the link from the course homepage (<http://bvans.net/mth120>) or go directly to <https://courses.webwork.maa.org/webwork2/meccuny-mth120>

First login:

Your username: [first name].[last name] (no capitals)

Your original password: your first name with capitalized first letter

For example, if your name was Joy Smith, then your

username would be joy.smith and your original password would be Joy

Then hit **Continue** (not Guest Login)

Change password and email:

As soon as you have logged in, you should change your password to something you will remember, and enter an email address you frequently check. You do this by clicking the 'password/email' link on the far left, filling out the necessary information and then pressing 'change user options.'

Assignments

To begin working on assignments, click on 'Homework Sets' on the far left and then on 'WWSet00_IntroToWW'

Every homework set has a due date. You will only get credit for the problems you've correctly answered before that date.

You can attempt a problem as many times as you'd like. The number of times you attempt a problem has no impact on your score.

Internet Explorer

I recommend using the browser Firefox (available at getfirefox.com) If you are using Internet Explorer and the browser asks whether to 'Only Display Secure Items', you should answer "No".

Guest login

For further practice, you can do slightly different versions of the problems by using the 'Guest Login' button. No credit is earned this way.

Technical trouble?

Go to the math tutorial room (in the math department on the ground floor of AB1), talk to me, or send me an email at bartvs@mec.cuny.edu
